---

Thank you all for reviewing the epidemiology workshop material. I apologize for the short notice, and I know the time line has been far from ideal. I believe the end result is a better product because of your comments and suggestions.

This revision addresses the major issues raised. The major changes are:

(b) (5)

We would like to send the final version to workshop participants by COB tomorrow (Friday). If you have anything else you want to bring up, please let me know by 3 pm.

I'm incorporating some of Cheryl's ideas into an introductory presentation for the meeting; I've already gotten comments from Cheryl, Jennifer, Barbara Glenn, and Mike Wright about this presentation and am aiming to have a version of the slides submitted to clearance tomorrow afternoon.

As mentioned previously by Bob Sonawane, please do not contact Ron White or others at Johns Hopkins about this matter. All communications should go through Tom Bateson (the PO) or me (alternate PO).

(Note: The changes in the document aren't shown using track changes because it was too difficult to peruse the document with track changes with the big deletions that were made)

Again, thank you for your feedback. There will be other opportunities to review the report that is prepared based on the workshop.

Glinda
